NMVTIS Consumer Access Disclaimer

The National Motor Vehicle Title Information System (NMVTIS) is an electronic system that contains information on vehicle titles and brand history to serve as a reliable source of title and brand history for a vehicle's repair history. (https://www.vehiclehistory.gov/nmvtis_glossary.html)

All states, insurance companies, and junk and salvage yards are required by federal law to regularly report information on all motor vehicles in the United States because some states (https://www.vehiclehistory.gov/nmvtis_states.html) send data provided to NMVTIS by states is provided in a variety of time frames; while some states report and update NMVTIS data less frequently, such as once every 24 hours or within a period of days. Information on previous, significant damage to a vehicle was never determined by an insurance company (or other appropriate entity) to be a "total loss" or brand damaged. NMVTIS is required to report a "total loss" even if the vehicle's titling-state has not determined the vehicle to be "salvage" or "brand damaged".

A vehicle history report is NOT a substitute for an independent vehicle inspection. Before making a decision to purchase a vehicle, consumers should obtain an independent vehicle inspection. The Approved NMVTIS Data Provider (https://www.vehiclehistory.gov/nmvtis_vehiclehistory.html) (look for the NMVTIS logo) can include vehicle condition information.

Before making a decision to purchase a vehicle, consumers may wish to obtain an independent vehicle inspection. For more information on vehicle information resources, visit www.vehiclehistory.gov.

NMVTIS data INCLUDES (as available by those entities required to report to the System):

Information from participating (https://www.vehiclehistory.gov/nmvtis_states.html) state motor vehicle titling agencies includes recreational vehicles, motor homes, and tractors. NMVTIS may not currently include commercial vehicles if those records (in some states, those vehicles are managed by a separate state agency), although these records may be provided by participating state motor vehicle titling agencies. Brand types and definitions vary by state, but may include "total loss" or "brand damaged" vehicle.

Most recent odometer reading in the state's title record.

Information from insurance companies, and auto recyclers, including junk and salvage yards, that is required by law. Information will include if the vehicle was determined to be a "total loss" by an insurance carrier. Information from the National Motor Vehicle Title Information System is included in under the Consumer Assistance to Recycle and Save Act of 2009 (CARS) Program.

Consumers are advised to visit www.vehiclehistory.gov (<https://www.vehiclehistory.gov/>) for details on how to interpret various labels applied to vehicles by the participating state motor vehicle titling agencies. NMVTIS data in this report is provided by the Data Provider.
