send updates less frequently, such as once every 24 hours or within a period of days. Information on previous, significant damage to a vehicle was never determined by an insurance company (or other appropriate entity) to be a "total loss" or brand required to report a "total loss" even if the vehicle's titling-state has not determined the vehicle to be "salvage" or "junk".

A vehicle history report is NOT a substitute for an independent vehicle inspection. Before making a decision to purchase a vehicle, consumers should consider an independent vehicle inspection to ensure the vehicle does not have hidden damage. The Approved NMVTIS Data Provider (https://www.vehiclehistory.gov/nmvtis_vehiclehistory.html) (look for the NMVTIS logo) can include vehicle condition information.

Before making a decision to purchase a vehicle, consumers may wish to obtain an independent vehicle inspection. For more information, visit the following vehicle information resources.

NMVTIS data INCLUDES (as available by those entities required to report to the System):

Information from participating (https://www.vehiclehistory.gov/nmvtis_states.html) state motor vehicle titling agencies for passenger vehicles, recreational vehicles, motor homes, and tractors. NMVTIS may not currently include commercial vehicles if those records (in some states, those vehicles are managed by a separate state agency), although these records may be provided by participating state motor vehicle titling agencies. Brand types and definitions vary by state, but may include information on a vehicle.

Most recent odometer reading in the state's title record.

Information from insurance companies, and auto recyclers, including junk and salvage yards, that is required by law. Information will include if the vehicle was determined to be a "total loss" by an insurance carrier. Information from the National Highway Traffic Safety Administration in under the Consumer Assistance to Recycle and Save Act of 2009 (CARS) Program.

Consumers are advised to visit www.vehiclehistory.gov (https://www.vehiclehistory.gov/) for details on how to interpret various labels applied to vehicles by the participating state motor vehicle titling agencies. NMVTIS data in this report is provided by the DataONE Software Provider.
